

#### Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

**5 minutes** 

# Key rules of brainstorming To run an smooth and productive session

nent.

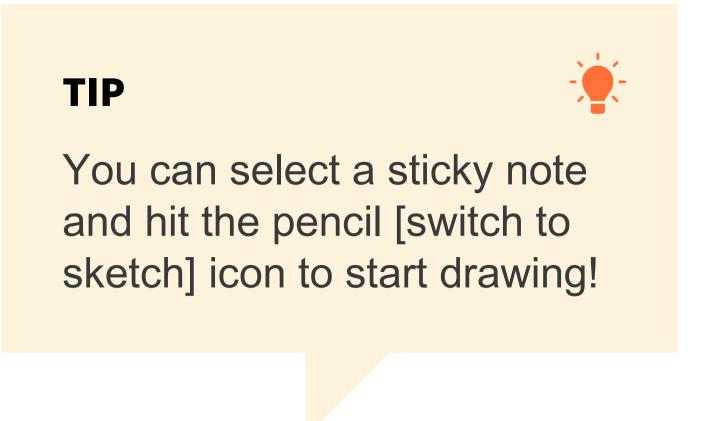

#### **Brainstorm**

Write down any ideas that come to mind that address your problem statement.

① 10 minutes

Person 8

V.Vaarani devi- Team leader			J.Tamilarasi			G.Pavithra			J.Vennila			
Liveliness of plants (Healthy / Dry)	Rarity of species	Locally saving the data in device	Using sound to identify bird's species	Botanical names	Identify amphibious specious	Display botanical names	Give green message for medicinal plants	what disease does the plant cure		Display scientific names	Identify poisonous species of plants	Identify dangerous animals
Multiple language support	compatability	Age of plants	Identify and alert for dangerous species	Available in other language	compatability	Orange alert for non- medicinal plants	is this a rare species?	Use app without network		provide red alert for dangerous species	small description about them	ways to cure poison and animal attack
										How rare a species is?		

Person 6	Person 7						

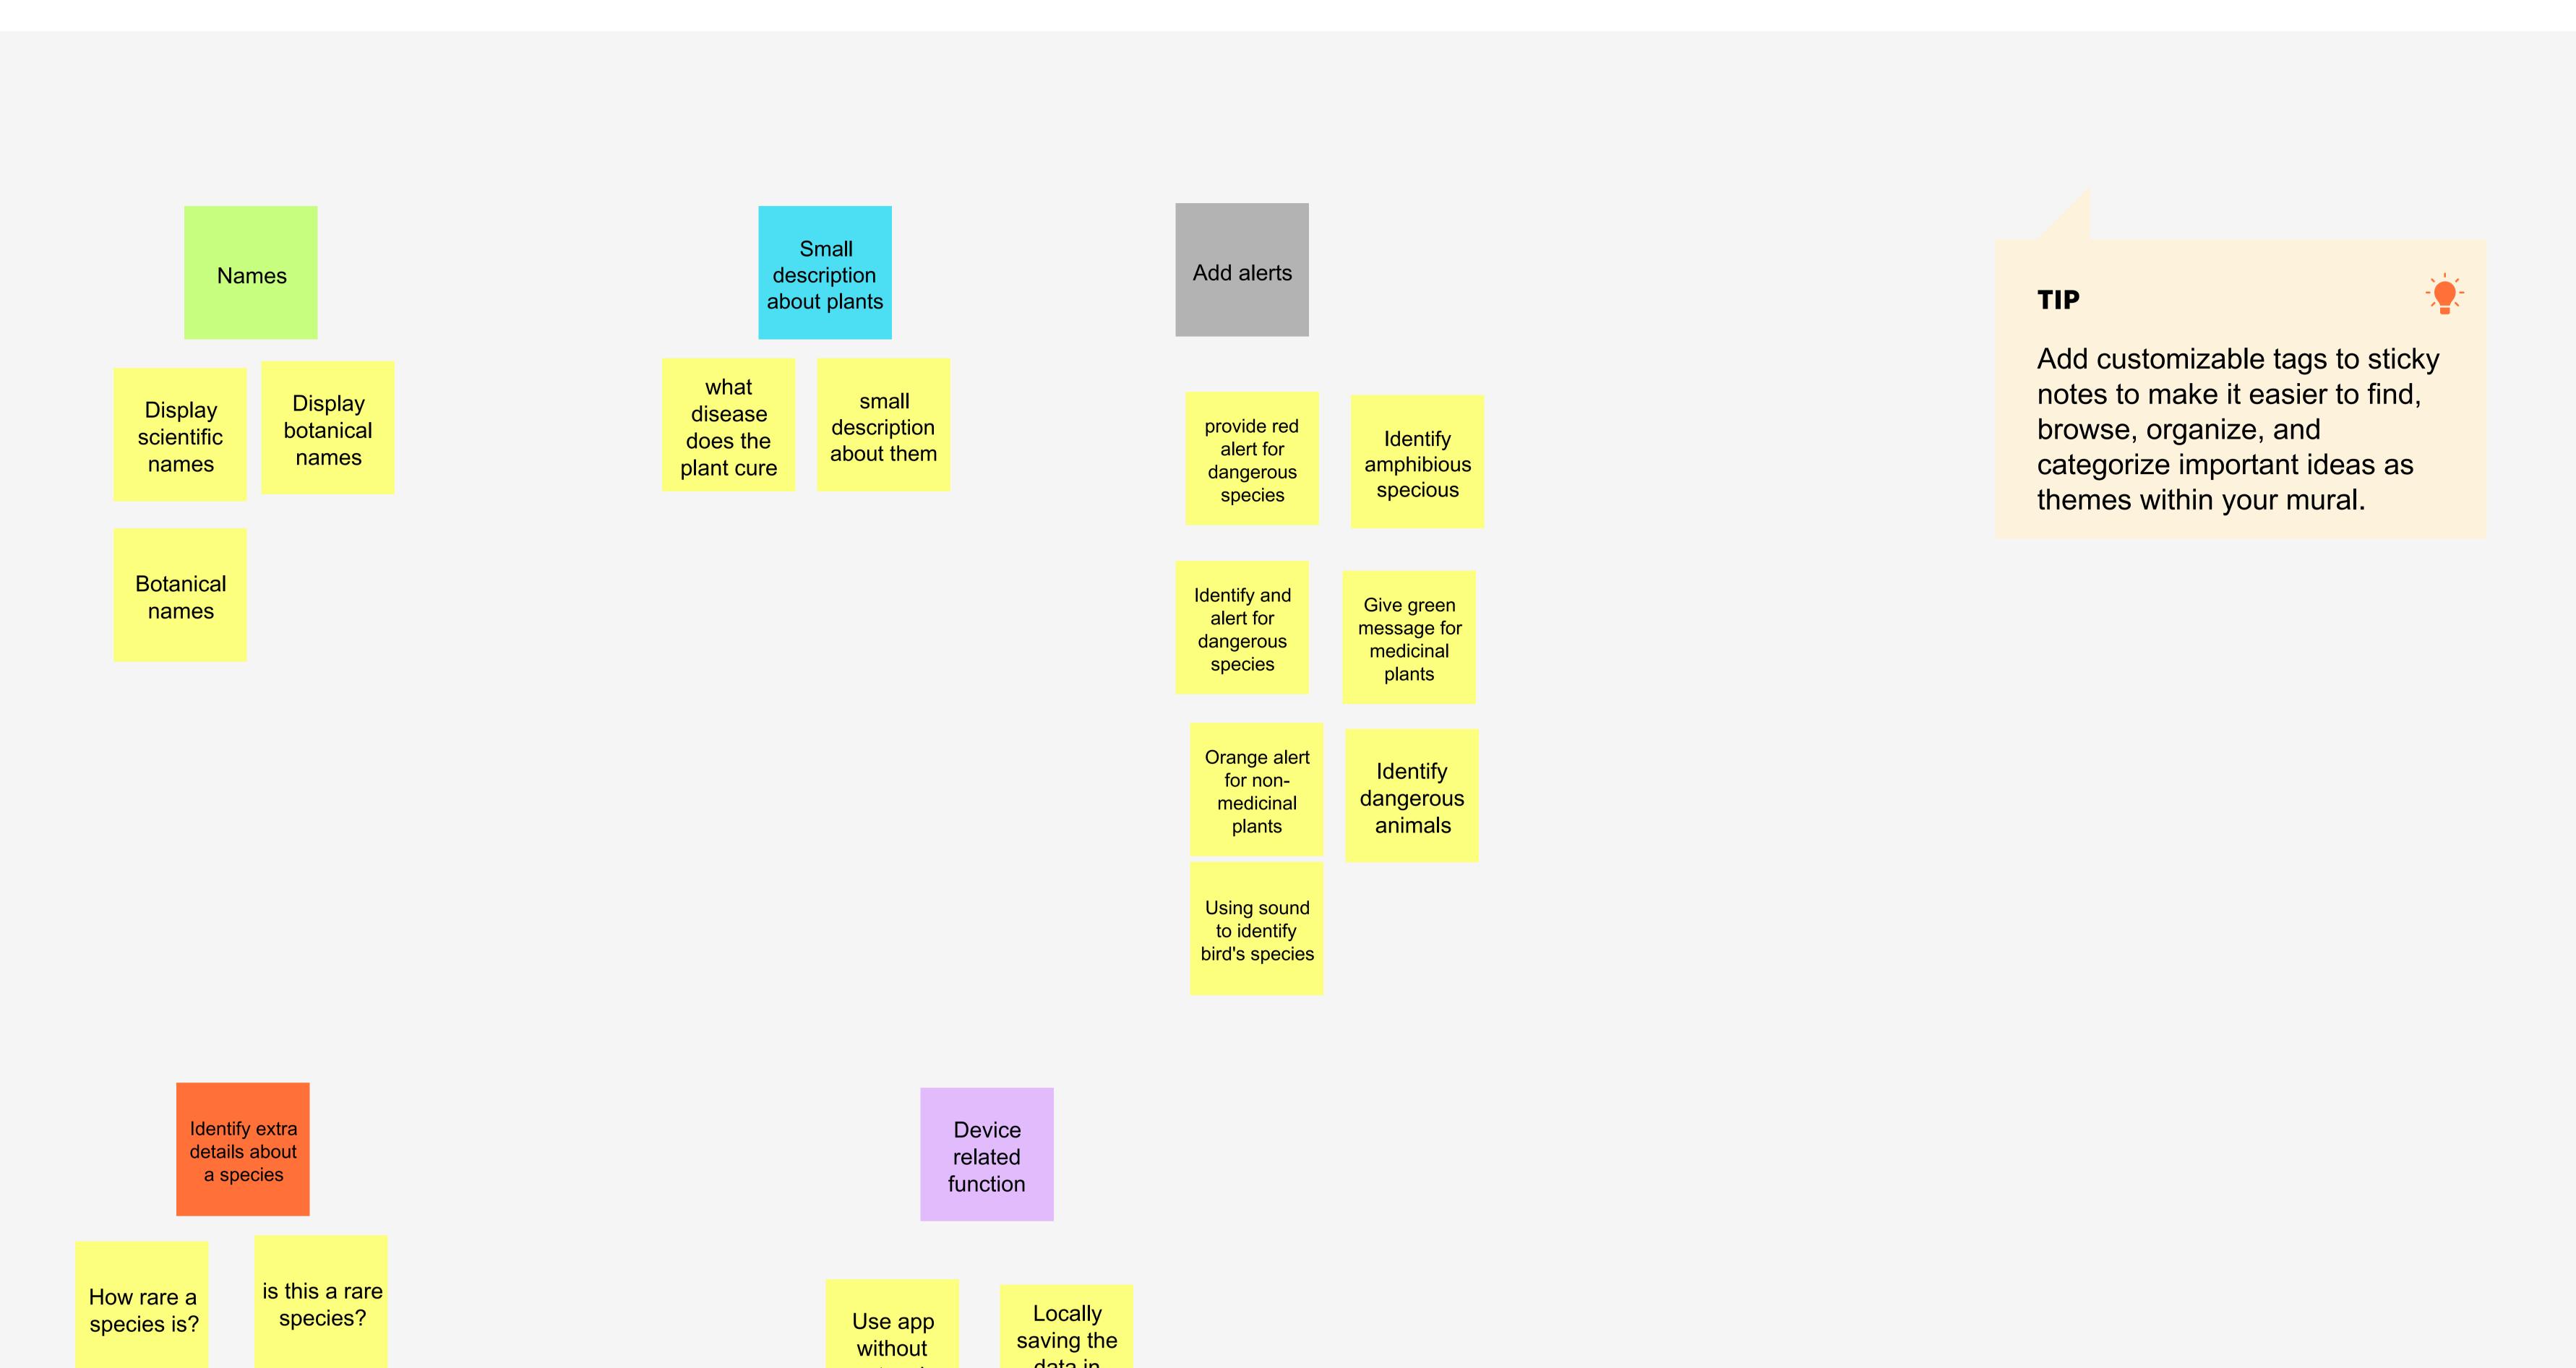

## Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

① 20 minutes

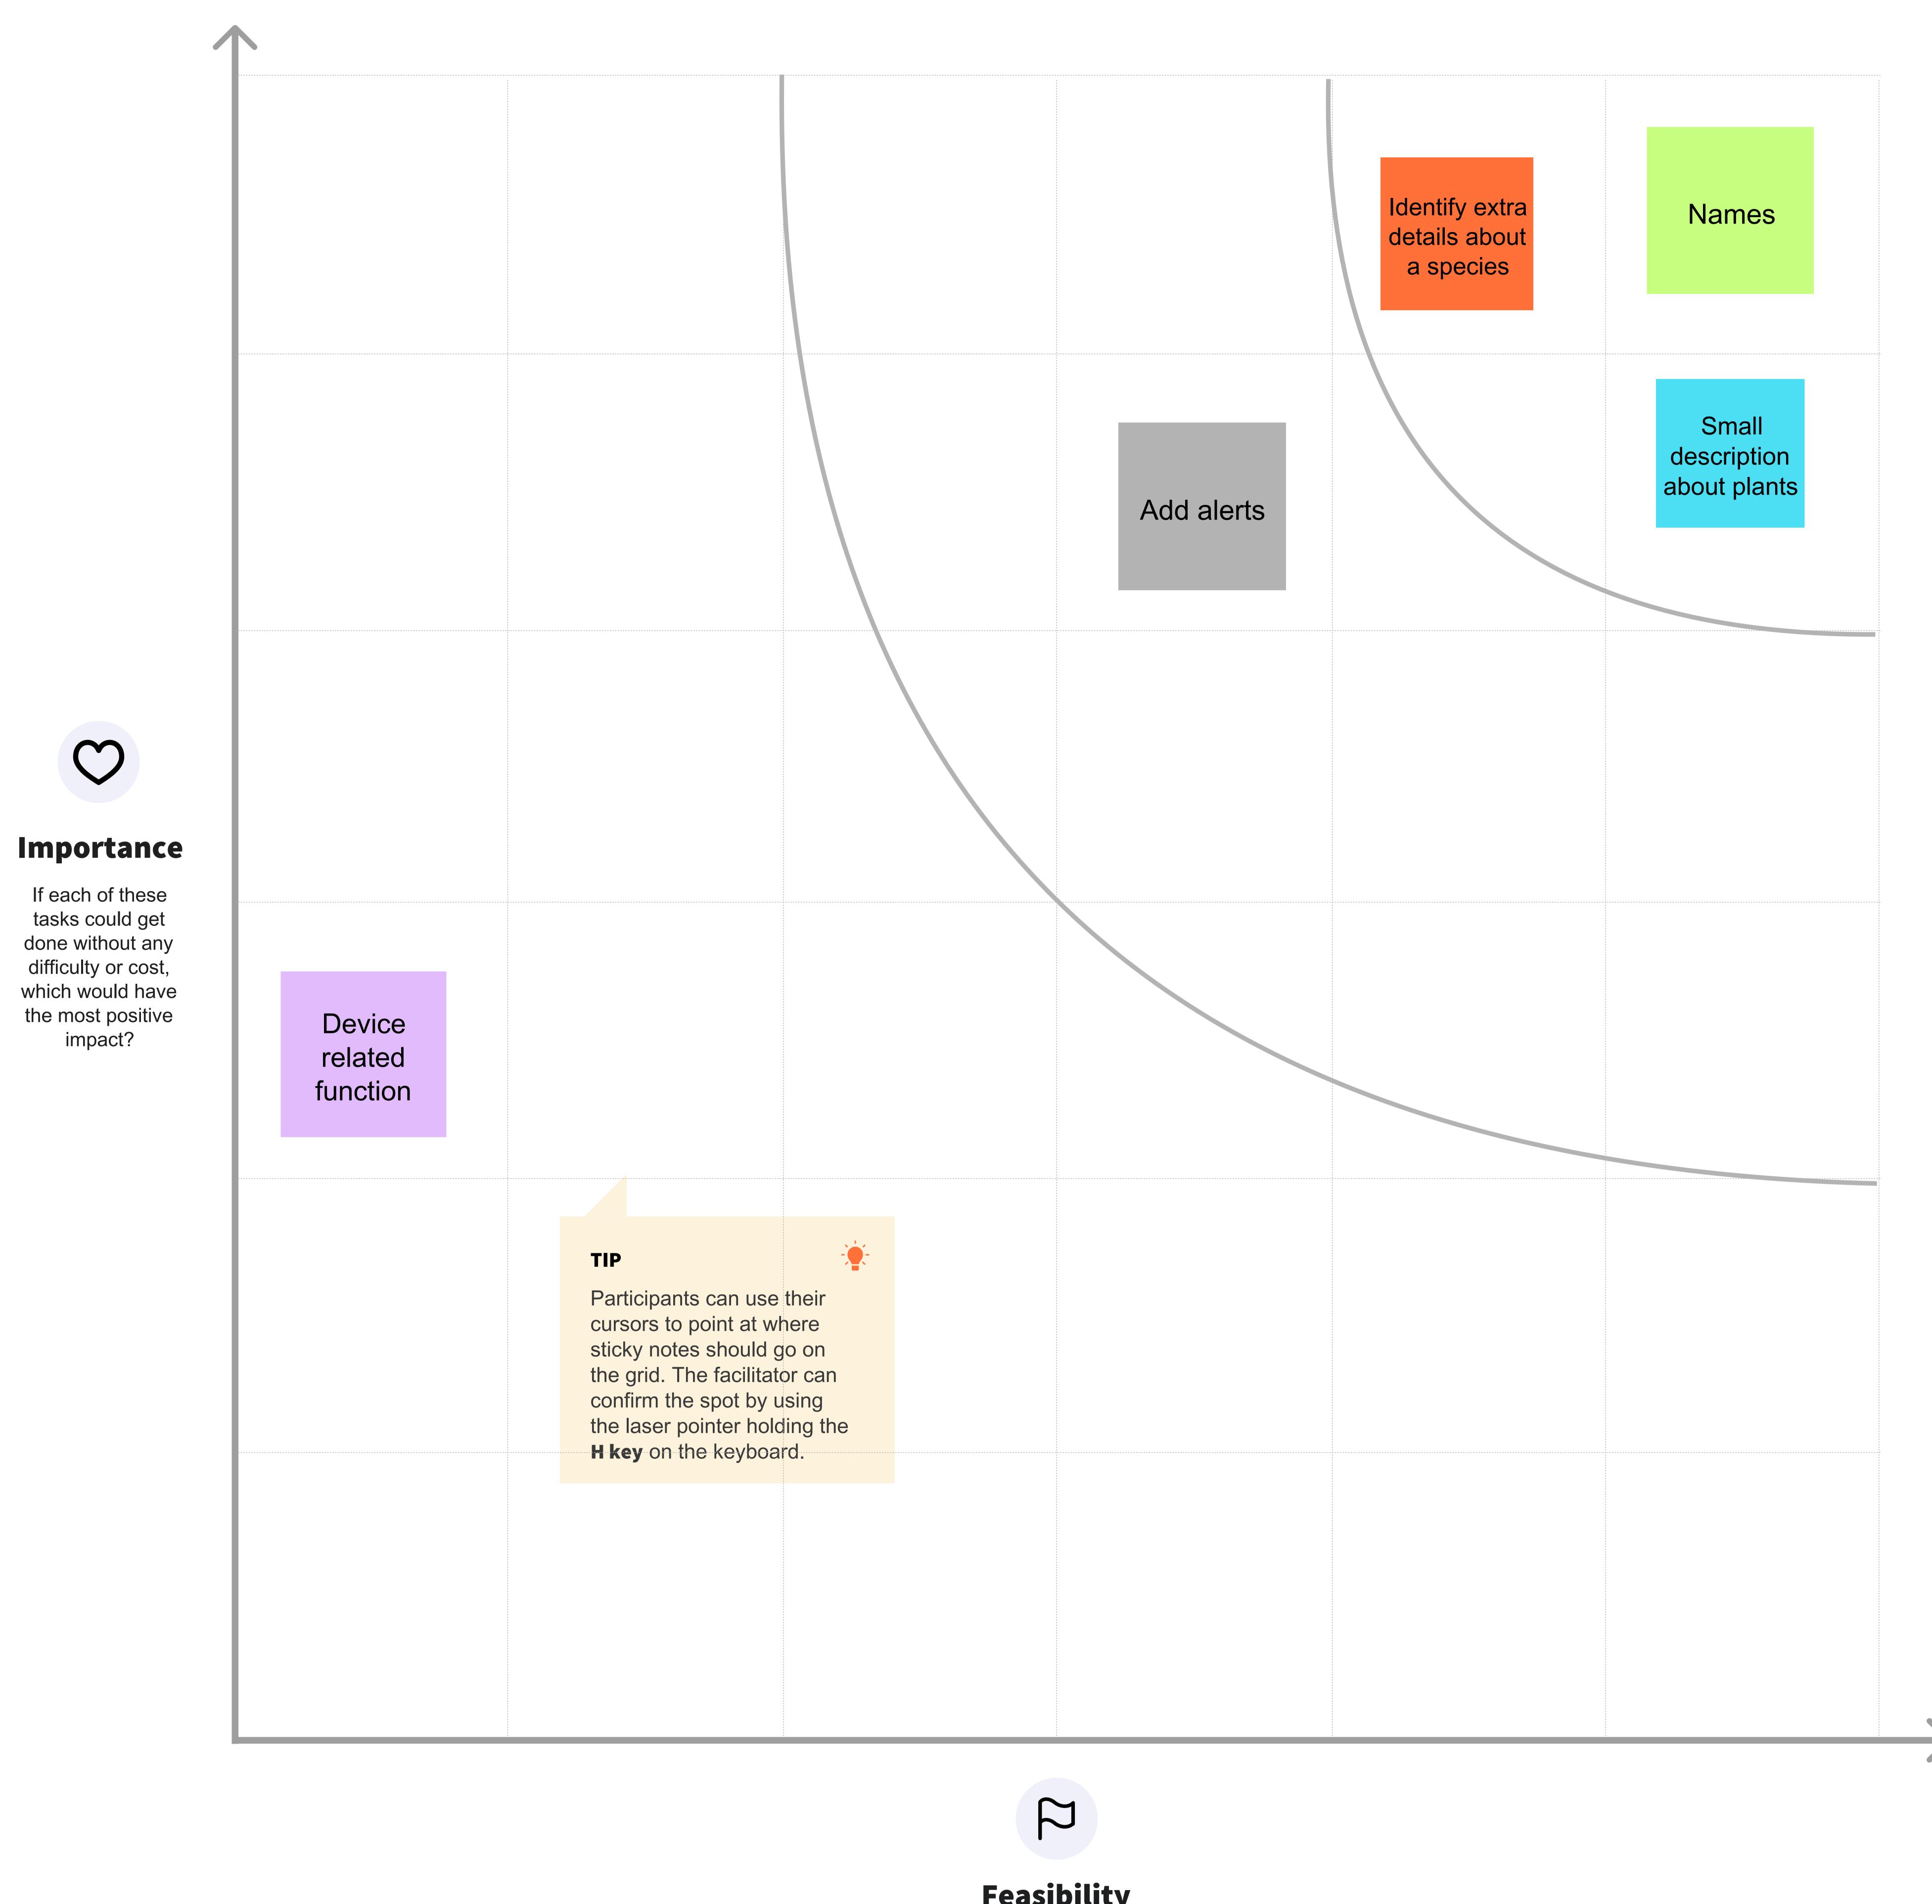

### Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

① 20 minutes

Feasibility

Regardless of their importance, which tasks are feasible than others? (Cost, time, effort, complexity)
